### Center for LNG Welcomes NextDecade as New Member

Washington, D.C. – The Center for Liquefied Natural Gas (CLNG) announced today that NextDecade Corporation has joined the organization. NextDecade (NASDAQ: NEXT) is an LNG development company primarily focused on export projects and associated pipelines in Texas. NextDecade intends to develop a portfolio of LNG projects, including the 27 mtpa Rio Grande LNG export facility in Brownsville, Texas and the 4.5 Bcf/d Rio Bravo Pipeline that would transport natural gas from the Agua Dulce area to Rio Grande LNG.

CLNG looks forward to working with NextDecade to raise awareness of the many uses and benefits of liquefied natural gas (LNG), particularly as the United States emerges as a leading supplier of safe and reliable LNG to markets around the world.

**Charlie Riedl, CLNG Executive Director:**

“NextDecade is a welcome addition to the Center for LNG, joining other companies that are shaping the future of the industry and providing unique ways in which the vast potential of this abundant and versatile fuel can be fully realized. Much like the U.S. and global LNG market, CLNG’s membership is diverse, effective, and growing.”

**Matt Schatzman, NextDecade President and Chief Executive Officer:**

“We are excited to join the Center for LNG and support the advancement of U.S. LNG in developed and emerging markets around the world. We look forward to working with our fellow members to promote knowledge and understanding of the economic, environmental, trade, and other benefits of LNG, and to delivering a project that helps provide the world access to cleaner energy.”

####

The Center for Liquefied Natural Gas (CLNG) advocates for public policies that advance the use of liquefied natural gas (LNG) in the United States, and its export internationally. A committee of the Natural Gas Supply Association (NGSA), CLNG represents the full value chain, including LNG producers, shippers, terminal operators and developers, providing it with unique insight into the ways in which the vast potential of this abundant and versatile fuel can be fully realized.
