NGSA and CLNG Commend Senate Confirmation of James Danly to FERC

(Washington, D.C.) -- Dena E. Wiggins, President and CEO of the Natural Gas Supply Association (NGSA), and Charlie Riedl, Executive Director of the Center for LNG (CLNG), commended the Senate for its vote today to confirm James Danly to the Federal Energy Regulatory Commission (FERC).

NGSA President and CEO Dena Wiggins said:

“We applaud the Senate for its vote today and we look forward to working with Commissioner Danly at the Federal Energy Regulatory Commission. With his background as the FERC General Counsel, he understands the important role of competitive markets for consumers as well as the critical role of natural gas pipeline infrastructure projects in promoting a clean energy future. We look forward to a robust quorum at FERC, as the Commission produces its best results with a full complement of commissioners, and to working with Commissioner Danly as the FERC tackles the many challenging issues ahead.”

Center for LNG Executive Director Charlie Riedl said:

“As the global LNG market continues to grow and the United States plays a larger and larger role with six facilities exporting LNG, two facilities under construction and six more permitted, a well-staffed and educated FERC is essential. This confirmation brings the Commission to four members, providing greater certainty for buyers and sellers of natural gas and project developers. We look forward to working with Commissioner Danly and the other members of FERC to ensure a reliable and predictable LNG process.”

####

The Natural Gas Supply Association (NGSA) represents integrated and independent companies that supply natural gas. Founded in 1965, NGSA is the only national trade association that solely focuses on producer-marketer issues related to the downstream natural gas industry. NGSA advocates for well-functioning markets that foster a growing, competitive market for natural gas. NGSA is dedicated to achieving a cleaner future through strong partnerships with renewables and supporting innovative technologies and market solutions that reduce emissions. For more information, please visit www.ngsa.org.

The Center for Liquefied Natural Gas (CLNG) advocates for public policies that advance the use of liquefied natural gas (LNG) in the United States, and its export internationally. A committee of the Natural Gas Supply Association (NGSA), CLNG represents the full LNG value chain, including all six large-scale LNG export facilities in the United States, shippers, and multinational developers, providing it with unique insight into the ways in which the vast potential of this abundant and versatile fuel can be fully realized.
