CLNG Congratulates Alaska LNG on DOE Export Authorization

(Washington, D.C.) — The Center for LNG issued the following statement regarding the announcement that the Department of Energy granted authorization to Alaska LNG’s export facilities today.

Katharine Ehly, Senior Policy Advisor of the Center for LNG said,

“We are pleased that DOE has authorized Alaska LNG’s export facility. This approval marks another milestone for Alaska LNG, Alaska, and U.S. LNG.

“Alaska LNG represents a remarkable opportunity to provide affordable, reliable, and clean energy to markets in Asia while generating billions of dollars that will benefit Alaska’s economy and local communities. LNG from Alaska also will serve as a partner to renewable energy in Asia by providing a reliable backstop while helping to reduce the region’s emissions and air pollutants.”

The Center for Liquefied Natural Gas (CLNG) advocates for public policies that advance the use of liquefied natural gas (LNG) in the United States, and its export internationally. A committee of the Natural Gas Supply Association (NGSA), CLNG represents the full LNG value chain, including large-scale LNG producers in the United States, shippers, and multinational developers, providing it with unique insight into the ways in which the vast potential of this abundant and versatile fuel can be fully realized.
